00:59:17 Brittany Gaume: We are heartbroken about this. We really need legislators to understand our water crisis

01:00:00 Bill Bright: I don't see a Q & A this session but there are several of us in a small town that does not have extra water (aquifers only) but recently permitted a large water using factory to tap into city supply. Fortunately, the company failed before too much damage was done. My question is what state agency or org could we call on to address this beforehand next time?

01:00:04 Brittany Gaume: This is where we as advocates can pick up some of the slack. Have you had a conversation with your Senator and Rep about water and why its so important?

01:06:06 Brittany Gaume: We will post all slides on our website

01:06:10 Bill Bright: Replying to "This is where we as ..."

In our case it was one of our elected state reps who recruited the factory & pressure the city to permit it.
